Four Seasons Energy Efficient Roofing, Inc.  
1410 Quant Ave North  
MOSC, MN 55047

To Whom It May Concern:

Four Seasons Energy Efficient Roofing, Inc. (FSEER) installed an Energy Star, white Duro-Last roof on our building in June 2011. We were very happy with their whole process: understandable and concise bid, quiet and quick installation, and effective and good workmanship on the roof.

We asked FSEER to load the roof between noon and 1 pm while we were at lunch so the noise of loading the roof would not disturb our classes. FSEER did this and it went well. We then asked FSEER to install the Duro-Last Roofing System on the weekend when we have no classes, which they did. We also asked FSEER to complete the roof as soon as possible and clean up all debris. They were in and out very quickly. It was as if they weren't even there.

The roof was put to test within days after the installation with over four inches of rain falling in one day! The new roofing performed as we were told it would and our building stayed dry.

The warranty covers a full 15 Year No Dollar Limit (NDL) and covers all labor, materials, and all consequential damages that could happen inside the building (computers, furniture, etc.) for a full 15 years.

We at Trimetal, LLC will use Four Seasons Energy Efficient Roofing, Inc. (FSEER) to complete any of our roofing needs, and we highly recommend them to others.

Sincerely,

Letonya Ackland  
Business Manager  
Trimetal, LLC.
